Next-Generation Anti-Exploit, Anti-Ransomeware and Root Cause Analysis

Sophos Intercept X adds next-generation signatureless technologies on top of your current endpoint security to give you complete, layered protection.

Build your next-gen endpoint protection

The days of straightforward file scanning are long gone. Your goal is now to prevent threats from reaching your devices, stop them before they run, detect them if they have bypassed preventative methods, and not just clean up malware, but analyse and undo everything it does to your endpoints.

Sophos Intercept X uses multiple layers of technology, allowing you to create your own tailored next-generation endpoint security solution.

Protect vulnerable software

Anti-exploit technology stops threats before they become an issue by recognising and blocking common malware delivery techniques, thus protecting your endpoints from unknown threats and zero-day vulnerabilities.

Effective ransomware detection

CryptoGuard technology detects spontaneous malicious data encryption to stop ransomware in its tracks. Even if trusted files or processes are abused or hijacked, CryptoGuard will stop and revert them without any interaction from users or IT support personnel. CryptoGuard works silently at the file system level, keeping track of remote computers and local processes that attempt to modify your documents and other files.

Key Features

- Anti-exploit zero-day defense
- Anti-ransomware CryptoGuard technology
- Root cause analysis
- Lingering malware removal with Sophos Clean
- Augments your existing antivirus investment

Root cause analysis

Identifying malware and isolating and removing it solves the immediate problem. But do you really know what the malware did before it was removed, or how it was introduced in the first place? Root cause analysis shows you all the events that led up to a detection. You'll be able to understand what files, processes, and registry keys were touched by the malware and activate your advanced system clean to rewind time.

Add next-gen protection to your traditional security

Sophos Intercept X complements existing anti-malware and antivirus implementations delivering powerful next-gen anti-exploit and anti-ransomware protection traditional products lack. By eliminating the attack vectors which traditional solutions don't block, Sophos Intercept X helps to harden your security posture and increase resilience.
