

## Future proof your hotel and start saving on calls

**Did you know you can use your existing telephone system to make calls over the internet? Not many people do. SIP trunking is a flexible, lower cost alternative to ISDN lines for inbound and outbound voice calls, and allows your business to experience the benefits of a hosted solution without removing its legacy telephone equipment.**

### What is SIP Trunking?

SIP Trunking is a way of making high quality voice calls over your IP connection, using Voice over IP (VoIP) to facilitate connection of a PBX telephone system to an IP telephony platform. Once connected you can continue to operate your telephone system in the same way to make and receive calls, but in a more flexible and cost effective way than traditional methods.

### Reduce costs

SIP Trunking can save on call costs and line rental charges, business continuity and calling and network features in comparison to traditional fixed line services.

### Number flexibility

Opening a new establishment and unable to take your existing number with you? With QDOS SIP trunking solutions, this isn't a problem, you can use area codes from anywhere in the UK and point your non-geographic to your SIP Service. You can even request your number before your hotel actually opens.

### Fraud Prevention

The cost of telecoms is an ever increasing figure, with our SIP trunking services you can protect your business with multiple fraud prevention methods at no extra cost.

### Peace of mind

With QDOS SIP solutions we can provide automatic failover to your other sites, the ideal solution in the event of a disaster or unforeseen event such as a power cut to keep your hotel running smoothly.

### Maximise call quality with suitable bandwidth

To enable your business gets the most out of our business SIP trunk solution, it is important you are using the right type of internet connectivity.

At QDOS we offer an entire range of business grade broadband and fibre options alongside dedicated connectivity using Ethernet technology and will work closely with you to provide you with the best option based on your business requirements.
